Graph tables. 300 range.

Graph Tables.

Integrated design. Classy spans. Diverse formats.

The Graph tables reflect the principal design feature of the Graph chairs. The chair's apparently seamless foot section, armrests and seat are mirrored in the Graph tables. On the table frame the aluminium underframes echo the sloping die-cast aluminium legs and their curved and flat look. As a result light lines appear consistently on the table frame, lending the frame a seamless appearance. The large spans also create an impression of elegance where gravity seems almost suspended. This effect is enhanced by the asymmetrically curved table edges and the rounded corners of the table.

The formats include round tables, as well as compact and long oval shapes which are based on squares and triangles. Sizes range from 120 by 120 to 780 by 230 centimetres ($47^{1}/_{4}$" by $47^{1}/_{4}$" to $212^{5}/_{8}$" by $90^{1}/_{4}$") and provide generous space for four to 22 people. As a stylish table for meetings, or prestigious piece of conferencing furniture, Graph stands for high-quality interaction.

Graph table. 300 range. Technical details.

Wilkhahn

Design: jehs+laub

Function
A high-quality table system for traditional conference and executive workspaces.

Frame
Table legs are made of bright chrome-plated aluminium, matt polished chrome, or coated in black, or signal white. Table cross-beams/underframes are made of aluminium extruded profile, colour matched with the table legs (except for model 300/50, reinforcement underframes on the inside are always black). Table top bearers to connect the table top area made of black-coated steel, except when the frame is coated white, the table top bearer is coated white. Adjustable table glides (10 mm) are made of steel, the glide cover is made of die-cast zinc, surface the same as the frame, with glide insert made of polyamide for soft floorings and polyurethane for hard floorings or with felt insert.

Table tops
Medium density fibreboard (MDF).

Table top group 2 – veneer
Table top thickness 26 mm (1")
Variation 1:
Veneers made of beech, oak or ash based on the Wilkhahn woodstain colour samples with
colour matched and symmetrically curved table edge, protected with colourless natural wood varnish.
Variation 2:
veneers made of maple, walnut or elm as well as Wilkhahn Mocca veneer with colour-matched and symmetrically curved table edge, protected with colourless natural wood varnish.

Table top group 6 - varnished
Table top thickness 25 mm (1")
Varnished in white or black
with colour matched and symmetrically curved table edge.

Accessories

Cable channel
Cable channel made of aluminium extruded profile, retractable, coated black.

Single table portal opening lengthways and crossways
Portal opening lengthways, bevelled on both of the long sides (can be used on both sides), gas-lift damped automatic opening mechanism, portal on both sides in the same colour and material as the table.
Single table portal: 300 x 165 mm (11¾" x 6½")

Portal opening sideways, bevelled on one long side (can be used from one side), gas-lift damped automatic opening mechanism, portal on both sides in the same colour and material as the surface of the table.
Single table portal: 300 x 165 mm (11¾" x 6½")

Single table portal basic:
Aluminium installation frame with portal and brushed profile.
Single table portal: 300 x 120 mm (11¾" x 4¾")

Vertical cable management
Flexible black cable sheath. Length including table attachment and floor panel approx. 75 cm.

Standards
The Graph tables comply with the DIN EN 527 and the ANSI / BIFMA X 5.5 standards.

Environment and product

A timeless aesthetic, added functional value and consistent quality
Graph tables are made to be hard-wearing and very versatile. The design is contemporary, yet won't quickly look outdated. The large spans, proportions and pleasant haptics make the tables versatile options. The quality of the materials used and the method of connecting the components are designed to last and last.

The materials comply with Wilkhahn's ecological product development requirements:

- The table legs are made of die-cast aluminium and the underframes of aluminium extruded profile. A large proportion consists of recycled aluminium and all of it can be recycled without any decrease in the quality. The optionally available, retractable cable channels are also made of aluminium extruded profile.
- The table top bearers to affix the table tops and the glides are made of steel, a large proportion of which has also been recycled, and can also be easily recycled again. The glide covers are also made of die-cast zinc. Zinc is a natural material that offers dimensional accuracy and can be recycled without any loss of quality.
- Depending on the flooring, polyamide glides (for soft floorings) or polyurethane glides, optional with felt inserts (for hard floorings) can be chosen. Both types of plastic are not harmful to health and can be recycled.
- The table tops are made of medium-density fibreboard (MDF), a wood-based material (renewable) which can be very precisely processed without any distortion. With a special pressing method (using a vacuum membrane press) the symmetrically curved table edges can be veneered right up to the outside border so that only narrow laminated wood lipping is necessary instead of wide, chamfered full-wood lipping. In addition to real-wood veneers protected with clear varnish, coloured coatings are also available. After a long product life, the table tops can be recycled.

As an alternative, MDF core panels with glass tops varnished on the bottom and made of 10-mm-thick single-pane reinforced glass are used, some of which has already been recycled and can be recycled again in the future.
