

Wilkhahn

230 range task and visitor chairs.

Minimal materials. Maximum transparency. Simple to use.

This range is an ingenious combination of lightweight furniture that is comfortable at the same time. So what could be more logical than to add a visitor and standard office task chair to the concept? The visitor task chair has a flat, four-arm star base and the transportable, height-adjustable office chair has a vertically aligned, five-star, die-cast aluminium base. Similarly to the swivel pedestals, they are bright chromium plated and therefore particularly robust. Both models have a contact suppression feature and are very flexible. As a result, they are very comfortable for a range of applications, for meetings, discussions, showrooms, reading rooms, Internet cafés or at your desk at home.

230 range visitor and office chair
Design: Andreas Störiko

Model 231/2
grey fabric, bright chrome-plated aluminium frame

232/2

The through-dyed, covered seat and backrest frame are available in black, grey or white, optionally with or without armrests. For the black type, the cover is also available in silver-black, or copper-black.

For even more comfort and choices of material and color: the seats on the task chairs can have textile cushions with high-quality stitched fluting on request.
